Non-Functional Demonstrator Masks are used by many airlines for passenger briefings and instruction. These low- cost, rugged masks are designed to last longer and look better over long periods of use than conventional masks. The demonstrator masks are non-functional and cannot be connected to or mistaken for functional units.

289 Series Airline Passenger Oxygen Masks and Non-Functional Demonstrator Masks

The AVOX Systems line of Aviation Passenger Oxygen Masks features two basic series designed to meet FAA and aircraft manufacturers' specifications. Several configurations are also qualified for business jets and other general aircraft use.

Molded silicone rubber facepieces are bright yellow for instant identification, and vinyl reservoirs are imprinted with quick-donning instructions. All AVOX Systems masks are easily installed and require only minimum servicing.

Two different types of flow indicators are available to assure passengers and flight attendants that the unit is functioning properly. They meet FAA TSO-C64, TSO-C64a and SAE AS8025 requirements and are completely interchangeable with current masks on most major airlines.
